```javascript
async function readUser() {
    const BR = "<BR>",
     URL = "https://api.github.com/users/"
    let u = await toJSON(URL+usr.value)
    if (!u || !u.login)
     error(usr.value+' not found')
    //u.login is the same as usr.value
    out.style.color = ''
    out.innerHTML = ''
    //start with a tiny image
    let i = document.createElement("img")
    i.src = u.avatar_url
    i.align = "center"
    out.appendChild(i)
    //add name
    let s = u.name
    out.innerHTML += BR+s.bold()+BR; console.log(s)
    //add login
    let l = u.login
    out.innerHTML += l+BR+BR; console.log(s)
    //add company
    let c = u.company
    out.innerHTML += c+BR; console.log(u.company)
    // add location
    if (u.location) s = u.location
    out.innerHTML += s+BR; console.log(s)
    //blog
    let b = document.createElement("a")
    b.href = u.blog
    b.target = "NewTab"
    b.innerText = u.blog
    console.log(u.blog)
    out.appendChild(b)
}
```
